

# CRAYHON RESEARCH'S PELTIER ELECTROLYTES™

## A FOUNDATIONAL SUPPLEMENT WITH A WIDE RANGE OF CLINICAL APPLICATIONS

There are over forty-five essential nutrients, yet the major minerals known as electrolytes form the metabolic foundation for them all. Without electrolytes, no other nutrients can function or exercise their healing benefit to their full potential.<sup>1\*</sup> Optimizing electrolyte intake, therefore, is essential for the success of any nutrition program. Unfortunately, however, electrolytes are often missing or out of balance.<sup>2</sup>

### Such deficiencies and imbalances can lead to:

- Fatigue<sup>3\*</sup>
- Heart Rhythm Disturbances<sup>4\*</sup>
- Poor Blood Pressure Control<sup>5\*</sup>
- Suboptimal Heart Health<sup>6\*</sup>
- Bone Loss<sup>7\*</sup>
- Poor Circulation<sup>8\*</sup>

### People Who Can Benefit From Electrolyte Supplementation:

- Have suboptimal heart health, rhythm disturbances or congestive heart failure<sup>9\*</sup>
- Experience Premenstrual Syndrome<sup>10\*</sup>
- Engage in sports, especially endurance sports<sup>11\*</sup>
- Need to improve or optimize bone health<sup>12\*</sup>
- Have recurring kidney stones<sup>13\*</sup>
- Have blood pressure that is either too high or too low<sup>14\*</sup>
- Have poor circulation or cold hands and feet<sup>15\*</sup>
- Take diuretic medication<sup>16\*</sup>
- Experience bloating/fluid retention<sup>17\*</sup>
- Are engaged in a detoxification program, especially one liberating toxic metals<sup>18\*</sup>
- Need to support mitochondrial function and experience mitochondrially-related disorders such as migraines<sup>19\*</sup>
- Need to promote a more alkaline metabolism<sup>20\*</sup>

## Unique features of Peltier Electrolytes™:

- Manufactured in a unique and proprietary process to ensure that each mineral is in a correct ratio to every other mineral
- Peltier Electrolytes are extremely well-absorbed as they are present in the ionic state
- Contains the exact ratio of potassium, sodium, magnesium, phosphorus, chlorides, bicarbonates and sulfates to promote optimal electrolyte balance and support the stresses of everyday living<sup>21\*</sup>
- The formula has been tested and perfected over ten years in use by firefighters, high performance athletes, and others under unique stresses\*

Often, even when an advanced nutritional program does not seem to be working, optimizing electrolytes will often add the metabolic "spark" that can help a nutritional protocol to begin to work on the metabolic level and help achieve the desired clinical results.\*

*Peltier Electrolytes™ are based on research of over twenty years and are the finest and most cost-effective way to deliver electrolytes to the body.*

# CRAYHON RESEARCH'S PELTIER ELECTROLYTES™

## A FOUNDATIONAL SUPPLEMENT WITH A WIDE RANGE OF CLINICAL APPLICATIONS

**Suggested dose:** 1 tablespoon of the liquid concentrate, dissolved in any beverage, two to three times per day. Can also be added to rice, soups, stews, vegetables dishes, chili, or any recipe that calls for water and salt. Do not consume without diluting in liquid or food.

### Peltier Electrolytes™ come in three varieties:

- **Standard Formula** For optimizing electrolyte intake for most situations
- **Executive Formula** For support during high levels of stress, and nutritional support for tight muscles\*
- **Sports Formula** Optimal electrolyte support for everyone from the weekend warrior to the elite athlete

### SPORTS FORMULA

#### Supplement Facts

Serving Size 1 tablespoon  
Servings Per Container 67

Amount Per Serving		% Daily Value
Phosphorus (as potassium phosphate)	229 mg	23%
Magnesium (as magnesium chloride, magnesium sulfate)	8 mg	2%
Chloride (as magnesium chloride potassium chloride, sodium chloride)	77 mg	2%
Sodium (as sodium bicarbonate, sodium chloride)	64 mg	3%
Potassium (as potassium bicarbonate, potassium chloride, potassium phosphate)	135 mg	4%

### EXECUTIVE FORMULA

#### Supplement Facts

Serving Size 1 tablespoon  
Servings Per Container 67

Amount Per Serving		% Daily Value
Phosphorus (as potassium phosphate)	232 mg	23%
Magnesium (as magnesium chloride, magnesium sulfate)	8 mg	2%
Chloride (as magnesium chloride potassium chloride, sodium chloride)	135 mg	4%
Sodium (as sodium bicarbonate, sodium chloride)	69 mg	3%
Potassium (as potassium bicarbonate, potassium chloride, potassium phosphate)	147 mg	4%

### STANDARD FORMULA

#### Supplement Facts

Serving Size 1 tablespoon  
Servings Per Container 67

Amount Per Serving		% Daily Value
Phosphorus (as potassium phosphate)	229 mg	23%
Magnesium (as magnesium chloride, magnesium sulfate)	8 mg	25%
Chloride (as magnesium chloride potassium chloride, sodium chloride)	136 mg	4%
Sodium (as sodium bicarbonate, sodium chloride)	75 mg	3%
Potassium (as potassium bicarbonate, potassium chloride, potassium phosphate)	138 mg	4%
