Living Nano-Tinctures

- * A Breakthrough in Achieving Unparalleled Bioavailability
- * Rapid Clinical Results for Heavy Metal Detox, Pain and More

Clearing Pain

*"I have found that sometimes a single dose of **Liver Nano-Detox™** can rapidly clear pain in a patient within minutes. I have never used a formula that worked this fast. The highly bioavailable phytonutrients can quickly go into the portal circulation to calm liver irritation – frequently the culprit in pain syndromes."*

-- Robert J. Marshall, PhD, CCN

What is a "nanized" herbal tincture?

The word "nano" means very, very small. A "nanized" tincture contains quantum quality herbs which have been "nanized" or pre-digested into very, very small particles which makes them extremely bio-available. Even those with poor digestion can rapidly absorb the "nanized" phytonutrients of the herbal complexes because they are so readily assimilable. The Nano-Detox™ tinctures really demonstrate the power of the old saying, it's not what you take, but what you absorb that makes the difference.

Many people can feel the effect of taking a Nano-Detox™ tincture within minutes. This immediate effect is very important in pain control, where absorption of key nutrients is critical to settle the inflammatory process which often initiates pain.

What is the Nanization Process?

The herbal complexes in the Nano-Detox™ tinctures have gone through a proprietary process to break down their components into "nanized" phytonutrients. This means that the herbal complex has been micro-digested into extremely small, highly bio-available particles using our special fermentation process.

We use unique, potent multi-strain probiotic colonies to assist in our "nanization" process. This allows rapid, unmatched bio-available cellular delivery of the herbal complex's healing factors, unlike any other product.

Most people can feel the effect of these products the first time they take them.

Why use an alcoholic tincture?

Top grade, organic alcohol is nature's perfect preservative. Its indigenous vasodilative properties function as a perfect transporter of our super-nanized phytonutrients into the blood to deliver almost immediate uptake, unparalleled by ordinary supplements.

For centuries, Oriental Medicine has known that nutrients preserved in alcohol directly target the liver, getting a faster, deeper response than when no alcohol is used. Tinctures preserved with alcohol have been used effectively for centuries. In contrast, tinctures made with a glycerine base cannot deliver the same effect as tinctures with an alcohol media. In addition, over time, nutrients degrade in the glycerine, slowly losing their potency.

Only the Best. We use only South American, organic alcohol, free of pesticides and chemotoxins. (Avoid tinctures with American alcohol since they are typically contaminated with chemotoxins.)

Want to avoid alcohol? In a typical dose (½ teaspoon) of tincture, you receive about 1/90 of an ounce of alcohol. For those who want to avoid alcohol but still get the full benefits of the tincture, simply place a dose of the tincture (usually ½ teaspoon) in a cup and add ½ cup of very hot water. Wait for 5 or 10 minutes for the alcohol to gas off. (Alcohol boils at 172° F. [or 78.5° C.] and will gas off at temperatures below boiling.)
